

Using Our Patient Portal:

The secure Patient Portal is a new way WesleyCare Family Medicine is empowering you to be actively involved in receiving personalized, quality healthcare!

How would you like to use your computer to check online for the date and time of your next appointment? Email your nurse or doctor anytime from any computer? View your lab results online? Access your personal medical record or visit summaries?

Sound good?? If so, please call one of our patient coordinators to sign up for access to the Patient Portal!

We'll need you to sign a consent form to give us permission to contact you through the portal. You'll also need to set up a user ID.

We'll need your email address to let you know you have information waiting for you in the portal (we'll never send secure information to your email—we'll only send it through the secure Patient Portal).

You can then access the Patient portal from the log in site at www.WesleyCareClinics.com.

1. In the Patient Portal log-in-box, click on "Login"
2. In the eClinical Web screen that comes up enter your user name and select "forgot password".
3. You'll be given a secure password that will be sent to the email address you have provided.
4. Use your user name and password in the eClinical Web box to open the Patient Portal! You'll see a personal message inbox and other links to important information!

If you have any problems, you may call WesleyCare Family Medicine Center at 962-3070 and ask for Tamara. She will help you get the Patient Portal Running!
